Subject: Demolition Bid

Sorry that I'm just getting around to your January 20, 2005 reply.

Through our conversations and a review of Mr. Jordahl's cost estimate for the demolition of the facilities at the site, he used salvage value of the steel to reduce the amount charged to demolish the buildings. We are not allowed to consider salvage values when estimating costs for mine sites.

Mr. Jordahl need to look at his estimate and not include those additional credits.

Sorry about the delay.

Joelle
